GUIDELINES FOR AUTHORS

MANUSCRIPT SUBMISSION
Submit manuscripts via JOMI’s online submission service:
www.manuscriptmanager.com/jomi
Manuscripts should be uploaded as a Word (doc) file with tables and figures preferably embedded at the end of the document. No paper version is required.

Acceptable material. Original articles are considered for publication on the condition they have not been published or submitted for publication elsewhere (except at the discretion of the editors). Articles on implant or tissue engineering (TE) basic or clinical research, clinical applications of implant/TE research and technology, proceedings of pertinent symposia or conferences, quality review papers, and matters of education related to the implant/TE field are invited.

Number of authors. Authors listed in the byline should be limited to four. Secondary contributors can be acknowledged at the end of the article. (Special circumstances will be considered by the editorial chairman.)

Review/editing of manuscripts. Manuscripts will be reviewed by the editorial chairman and will be subjected to blind review by the appropriate section editor and editorial staff consultants with expertise in the field that the article encompasses. The publisher reserves the right to edit accepted manuscripts to fit the space available and to ensure conciseness, clarity, and stylistic consistency, subject to the author’s final approval.

Adherence to guidelines. Manuscripts that are not prepared in accordance with these guidelines will be returned to the author before review.

ONLINE ONLY ARTICLES
All technology and case reports will appear in online format only. Articles are listed in the issue’s Table of Contents and abstracts are printed in the issue. Full text of articles is available online.

MANUSCRIPT PREPARATION
• The journal will follow as much as possible the recommendations of the International Committee of Medical Journal Editors (Vancouver Group) in regard to preparation of manuscripts and authorship (Uniform requirements for manuscripts submitted to biomedical journals. Ann Intern Med 1997;126:36–47). See http://www.icmje.org
• Manuscripts should be double-spaced with at least a one-inch margin all around. Number all pages. Do not include author names as headers or footers on each page.
• Title page. Page 1 should include the title of the article and the name, degrees, title, professional affiliation, and full address of all authors. Phone, fax, and e-mail address must also be provided for the corresponding author, who will be assumed to be the first-listed author unless otherwise noted. If the paper was presented before an organized group, the name of the organization, location, and date should be included.
• Abstract/key words. The abstract should include a maximum of 350 words. A list of key words should be provided, not to exceed six. Abstracts for basic and clinical research articles must be structured with the following four sections: Purpose, Materials and Methods, Results, and Conclusions. Abstracts of short communications should also be structured but should be a maximum of 250 words. For all other types of articles (ie, literature reviews, technical and case reports), abstracts should not exceed 250 words and need not be structured.
• Article text. Currently there is no article page limit (within reason).
• Acknowledgments. Persons who have made substantive contributions to the study can be acknowledged at the end of the article. Also specify grant or other financial support, citing the name of the supporting organization and grant number.
• Legends. Figure legends should be typed as a group at the end of the manuscript. Detailed legends are encouraged. For photomicrographs, specify original magnification and stain.
• Tables. Each table should be logically organized, typed on a separate page at the end of the manuscript, numbered consecutively. Table title and footnotes should be typed on the same page as the table.
• Abbreviations. The full term for which an abbreviation stands should precede its first use in the text unless it is a standard unit of measurement.
• Trade names. Generic terms are to be used whenever possible, but trade names and manufacturer name should be included parenthetically at first mention.
• Numbers. Per SI convention, numbers should be used in decimal points rather than commas for fractional numbers.

REFERENCES
All references must be cited in the text, numbered in order of appearance.
• The reference list should appear at the end of the article in numeric sequence.
• Do not include unpublished data or personal communications in the reference list. Cite such references parenthetically in the text and include a date.
• Avoid using abstracts as references.
• Provide complete information for each reference, including names of all authors (up to six). If the reference is to part of a book, also include title of the chapter and names of the book’s editor(s).
