MANUSCRIPT PREPARATION

• The journal will follow as much as possible the recommendations of the International Committee of Medical Journal Editors (Vancouver Group) in regard to preparation of manuscripts and authorship (Uniform requirements for manuscripts submitted to biomedical journals: http://www.icjme.org).

• Manuscripts should be typed in a 12-point font and double-spaced. Pages should be numbered.

• The first page(s) should include the title of the article and the complete names, academic degrees, titles, professional affiliations, full addresses, faxes, and emails. The corresponding author should be clearly noted; if it is not, the first author will be assumed to be the corresponding author.

• Abstract/key words. Abstracts should include a maximum of 250 words. Abstracts for Scientific Innovations articles must be structured: Purpose, Materials and Methods, Results, and Conclusions. Abstracts for all other types of articles that require one (see descriptions of 10 article categories) need not be structured; these articles should also include up to 6 key words.

• Article text. See page limits for the 10 types of articles.

• Acknowledgments. Persons who have made substantive contributions to the study can be acknowledged at the end of the article. Also specify grant or other financial support, citing the name of the supporting organization and grant number.

• Legends. Figure legends should be typed as group at the end of the manuscript. Detailed legends are encouraged. For photomicrographs, specify original magnification and stain.

• Tables. Each table should be logically organized, typed on a separate page at the end of the manuscript, and numbered consecutively. Table title and footnotes should be typed on the same page as the table.

• Abbreviations. The full term for which an abbreviation stands should precede its first use in the text unless it is a standard unit of measurement.

• Trade names. Generic terms are to be used whenever possible, but trade names and manufacturer name, city, state, and country should be included parenthetically at first mention.

REFERENCES

• All references must be cited in the text, numbered in order of appearance.

• The reference list should appear at the end of the article in numeric sequence.

• Do not include unpublished data or personal communications in the reference list. Cite such references parenthetically in the text and include a date.

• Avoid using abstracts as references.

• Provide complete information for each reference, including names of all authors (up to six). If the reference is to part of a book, also include title of the chapter and names of the book’s editor(s).
